

**Simplifying your life  
doesn't have to be  
rocket science.**

At Wybtrak, we understand that manually managing authorizations, submitting referrals, and keeping up with credentialing requirements can be overwhelming.

If your workload is astronomical, we need to talk.

Wybtrak's Credentialing and Prior Authorization/Referral software products are simple, yet robust. Our feature-rich (*yet user-friendly*) solutions allow you to manage the prior auth/referral and credentialing processes right from your desktop.

Better yet, our software is practical, affordable, and can be installed and put to use in minutes.

Simplify your life. Let Wybtrak help.
