About MedWired Corporation:

MedWired Corporation provides physician practices with personalized Web Portals. A Web Portal not only provides practices with a public presence on the Web, but also acts as an Internet Management Tool that the practice can use to integrate patients, employees, partners (such as health plans and hospitals), and vendors. A MedWired Web Portal is personalized to the needs of your practice, allowing you to communicate and interact with patients while managing front and back office processes from your desktop. We invite you to learn more about our Web-enabled solutions by calling us toll-free at 1.877.985.2900 or visiting us at www.medwired.com.
