

Clinical & Regulatory Solutions Group

The Sysix Advantage

Our multidisciplinary team of experts approach your business by reflecting your goals. Be it successful FDA submissions, regulatory reporting compliance, electronic submission or simply an aggressive schedule, we can help. Our broad perspective enables us to develop precise tools to support your objectives. This translates to expedient FDA approvals, increased compliance and greater profitability. Three interrelated professional units—Technical Solutions, Business Process Enhancement, and Biostatistics & Clinical Studies—work together to provide a comprehensive continuum of services and systems. We can help you anticipate your business needs and augment staff resources.

technical solutions

Through unprecedented applications, our Technical Solutions Professionals provide the systems and support necessary to integrate your manufacturing, clinical and regulatory functions. Our modular approach to software design enables us to rapidly construct individualized IT solutions. These solutions are then integrated and validated, the outcome of which is a seamless network of data.

business process enhancement

Our Business Process Enhancement Professionals improve your organization's efficiency to enable you to make optimal decisions. We use proven methods of project management, change control, prioritization, process design, validation and audit. These methods ensure that compliance needs are met in a manner that is designed to fit your team.

biostatistics & clinical studies

Our Biostatistics & Clinical Studies Professionals are adept at analyzing and managing data. Our team has substantial experience and expertise facilitating all phases of the clinical study process from design through submission. Our track record proves it. These capabilities, combined with our expertise working with regulatory and scientific leaders, provide you with a total solution in an increasingly complex regulatory environment.

Our People Are The Solution.
