

Nakoma Group Enterprise Solutions has provided PeopleSoft consulting services to customers ranging from education, government, and commercial, and from simple to complex. Our consultants have implemented and upgraded applications addressing unique business requirements while minimizing customization to ensure a low total cost of ownership.

Deploying PeopleSoft applications and conducting upgrades is Nakoma Group Enterprise Solutions' core business. Our consultants are experienced at implementing PeopleSoft's Financials, Supply Chain Management, and Human Capital Management suites, particularly with Education and Government clients.

## Implementation Methodology

Nakoma Group Enterprise Solutions' implementation methodology provides a deliverables-based, best-practices framework to guide projects to successful completion. Our methodology is a uniquely effective approach that speeds the implementation process, accelerates knowledge transfer, and facilitates the documentation of business process decisions.

Advantages of the methodology include:

- ◆  Increased opportunities to explore business process improvements and enterprise integration  
 (e.g. workflow and web enablement).
- ◆  Hands-on analysis and design take advantage  
 of existing user documentation, which can be enhanced to deliver specific test scripts and  
 end-user training.
- ◆  Support of a "vanilla" implementation.
- ◆  Establishing a stable environment prior to the completion of interfaces, conversions, and reports.
- ◆  Continuous end-user involvement that reinforces knowledge transfer and encourages self-sufficiency early in the process.

"Nakoma Group Enterprise Solutions' methodology put us weeks ahead of traditional approaches and kept our team involved and on schedule throughout the project. My staff quickly learned the new technology and how to get the most out of both the technology and our enhanced business processes."

Mike Spackman, Controller, Savage Industries

## Implementation Services

### Six-Step Staffing Process

Nakoma Group follows a strict hiring model, unique in the consulting world. Consultants are full-time employees, not contractors or agents, and they must have a combination of both technical and functional skill sets. As employees, they are committed to standing behind the Nakoma promise.

Nakoma Group Enterprise Solutions employs a six-step hiring process consisting of screening, background check, skills testing, technical interview, behavioral interview, and psychological testing.

Further, there is a stringent certification process that all consultants must pass. In addition to functional application and technical exams, Nakoma Group consultants must have a minimum of six years of hands-on consulting experience with PeopleSoft prior to joining the PeopleSoft consulting team.

### A Few Notable Statistics

**Product Experience.** Our consultants have worked with more than 150 PeopleSoft customers, nearly 40 PeopleSoft 8.x accounts, and 25 Education and Government PeopleSoft customers.

**Experience Level.** Nakoma Group employs more than 70 consultants who have an average of eight years PeopleSoft consulting experience. Project leaders are twelve-year veterans of enterprise software solutions.

**Versatile Skill Sets.** We only hire consultants that are skilled in both functional and technical areas, including multiple PeopleSoft product lines and technologies.
