

Today's Meetings Require Technology. That's Why We've Built It In.

Destiny Conferencing specializes in manufacturing high-end conferencing environments that incorporate technology into the design.

Although best-known for our TeleSuite® systems with life-size videoconferencing capabilities, Destiny also manufactures a wide range of conference furniture that complements any executive office or institution.

Each modular component is customizable and available with integrated technology, including data collaboration tools, presentation capabilities, audio and video conferencing and either wired or wireless connectivity.

Beauty Meets Durability.

Our modular furniture is made of medium-density fiberboard, covered with a thick vinyl coating available in a variety of finishes. The result is an appearance of high-quality wood with far more durability. Surfaces are resistant to damage due to moisture or scratching and are therefore much more practical for multi-use spaces. The best part? Our modular design allows for removal and replacement should any component suffer damage. And our peg-and-slot assembly systems not only reduce installation time by 50% or more, they're also easy to relocate.

Destiny Offers The Following Furniture Lines:

Conferencing:

- Standard conference tables of any size
- Conference tables with embedded technology:
 - Pop-up monitors
 - Tablets
 - Power and network connections at every seat
 - Sound systems
 - PCs

Destiny Conferencing Furnishings

Engineered For Your Comfort.

Destiny Conferencing's custom environments will make you want to attend more meetings. From comfortable chairs to sound-absorbent furniture and studio-quality lighting, we've considered human factors throughout every phase of our design process. Technology is integrated so it can be used naturally — it isn't cumbersome or in the way.

Whether you're looking for a high-end upgrade to an existing space or an entire free-standing environment, we can engineer a solution to fit your needs at a price that won't break your budget.

Quick Manufacturing And Delivery.

Custom conferencing environments can typically be designed, manufactured and installed within 60 days.

To increase exposure of your corporate image, ask about how we can engrave your logo into any of our furnishings.

Compare the cost of our high-end conferencing environments — complete with technology — to most any manufacturer. You'll be surprised at how affordable our systems really are.
