

Luxury Board Rooms + State-Of-The Art Technology = A Polished Corporate Image.

Destiny Conferencing's 400 series TeleSuite® systems allow groups from eight to 28 to interact productively in real-time, even though they may be thousands of miles apart. The patented design and proven technology dispel preconceived notions of videoconferencing and introduce a new generation of technology — interactive telepresence.

With eye-to-eye contact on a giant 16' x 4' screen, DVD-quality video, crystal-clear audio and zero latency, users say the experience is truly like being in the same room. Perhaps this is why usage rates are more than five times that of traditional videoconferencing. What's more, TeleSuite® systems are completely backward-compatible. Our customers report increased usage of their existing equipment, maximizing previous investments.

A Versatile System For Videoconferences — Or Any Conferences

TeleSuite® systems are modular kits that are delivered and installed in about a week as a "room-within-a-room" and can be fit to nearly any space in your building. Multipurpose models have tables set away from the screen, which allows for sales presentations, training and general meeting use when a videoconference is not in session. Customization is also available to accommodate specific needs.

400 Series technology includes:

- Giant 16' x 4' high-resolution screen
- Polycom VSX 8000 codec with encryption for security
- Telephone with 4-digit dialing within network
- Open-speaker system that eliminates echoes, feedback and cut-off sentences
- Touchscreen environmental controls, e.g. audio levels, muting and call add-in capability
- Four rear projectors & four hidden cameras
- Studio-quality lighting
- Multiple hidden microphones

400 Series technology includes:

- Comfortable chairs
- Conference tables with embedded pop-up LCD monitors
- Carpet in a variety of colors
- Cabinets and wainscoting in a choice of finishes

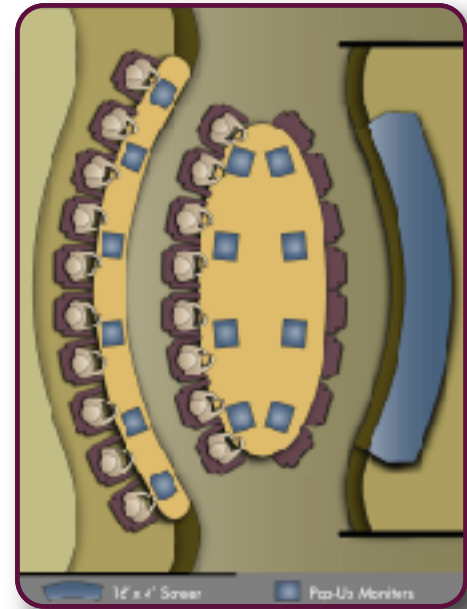

Not Just Videoconferencing — Full Data Collaboration.

To enable more productive and interactive meetings, each suite comes standard with the following tools for data collaboration:

- Wireless LAN
- Network and power connections at every seat to accommodate laptops
- PC with wireless keyboard and mouse linked to pop-up LCD monitors at every other seat
- Ability to project whiteboarding, VHS or DVDs, PowerPoint and spreadsheets
- Web collaboration capability
- Option to record meetings
- Document camera available

Sure, The Technology's Plug-And-Play. With Destiny, The Whole Suite Is.

You simply need basic telecom connections and two 120-volt power plugs. Then, every aspect of getting the room connected, from working with IT and facility managers to ordering circuits from the local telecom company, is handled by Destiny Conferencing's installation team. Standard turn-time for manufacturing, installation and network connection is 60 days.

TeleSuite® Model 418M

Support, Upkeep, Maintenance. Leave All That To Us.

Sites are remotely supported 24 x 7 by our Network Operations Center (NOC) in Dayton, Ohio. For increased reliability, we have four redundant locations worldwide. From site profiling and reservations to multipoint conference management, the NOC ensures that your meetings run smoothly. Enterprise Command Modules are also available for companies who prefer to manage their own networks.

Onsite maintenance checks and remove-and-replace upkeep for many TeleSuite® system components are performed by our field technicians every six months. As improvements are added, system control software is updated remotely from the NOC. These services are considered routine and are included in your monthly maintenance fee.

With Destiny Conferencing, seeing really is believing. Call us today to set up a visit at the TeleSuite® location nearest you. *Because suites are free-standing, they're depreciable. Leasing options are also available.*

TeleSuite® System Naming Convention Key.

418M □ □ The first digit indicates the number of 4' x 4' high-resolution screens

418M □ □ The second two numbers tell you how many people the room will accommodate at conference tables

418M □ □ The letter M (multipurpose) following a model number means that the table is set away from the screen, allowing for the suite □
