

Complete Product/Service Listing

As a leading provider of Proactive Monitoring and Virtual Services, Absolute Performance provides customers with a multitude of products and services, each designed to handle different issues with different service requirements. They include:

Proactive Monitoring & Virtual Services Operations Centers

Managing mission-critical enterprise applications requires more than just superior technology. It demands comprehensive, around-the-clock support. Absolute Performance's fully redundant 24 X 7 Proactive Monitoring & Virtual Services Operations Centers log, track, and close every incident, so customer support needs are resolved as quickly as possible.

Superior Customer-Centric Service Levels

Every customer has unique technology requirements. Success lies in identifying the right level of service to support the way customers manage their business, then finding the vendor who can deliver the right fit. Absolute Performance provides a versatile suite of services that covers full, 24 X 7 monitoring and problem notification. Customers can choose between various levels to fit managing Proactive Monitoring & Virtual Services requirements.

Operating System Monitoring

OS reliability is crucial to the operation of mission critical systems. Monitoring a complex set of internal and external connections and devices requires solid, around-the-clock resources and support. Absolute Performance meets those needs with its extensive OS services, including 24 X 7 monitoring, utilization statistics, and reports.

Database Monitoring

Identifying database bottlenecks that restrict the performance of Internet systems is essential to the success of any enterprise. Absolute Performance answers the call with proactive database monitoring, a complete set of database monitoring solutions. These services deliver monitoring, problem alert, and notification for mission-critical databases.

Web Server Monitoring

Today, Web site up-time matters more than ever, which means that monitoring Web servers requires resources and support around the clock. Absolute Performance delivers proactive Web server monitoring, alert, and notification for mission-critical Web servers.

Application Monitoring

Applications are the gateway to your mission-critical information systems. Without consistent and reliable application availability, your critical information systems no longer provide value to your business. Absolute Performance provides proactive application monitoring to ensure that you have complete utilization of the information necessary to maintaining your competitive advantage.

Virtual Services

Absolute Performance provides cyber management and virtual services for the real world. Regardless of your OS, RDBMS, or ERP applications, we can build customized, cost-effective solutions to address your needs. We will remotely and proactively monitor and maintain your mission critical systems, 24 hours a day, 7 days a week, allowing you to
