**When You Need Advanced Care,
Your Physician Refers You To A Specialist.**

Wouldn't You Want The Same For Your Pet?

CareCredit®

No Interest Client Payment Plans

We know that large veterinary expenses are often unplanned. In addition to accepting cash, checks and major credit cards, we offer CareCredit®. This no-interest or low-interest payment option can help you spread the cost of care over several months. Ask us about CareCredit or visit www.carecredit.com for more information.

Much like physicians specialize in different fields to more effectively treat human ailments, advanced veterinary care is increasingly in greater demand.

Because there were no full-time specialists in the area, out-of-town veterinarians traveled intermittently to Las Vegas for surgery and treatment of other specialized cases. But long waiting periods were often quite frustrating for the client and could be detrimental to the patient.

Introducing Las Vegas' First Centralized Veterinary Referral Center.

Simply put, we are a dedicated, full-time specialty practice that provides advanced diagnostic testing and treatment. We do not replace your primary care veterinary hospital.

In most cases, you will be referred to us by your veterinarian who either wants a second opinion or knows you are ready for a procedure that they are not equipped to handle in-house.

We consult with them through the whole process and send them reports within 24 hours of the procedure so they can resume your ongoing treatment.

Good Communication Means Less Stress.

We know it's stressful when you have a sick pet. That's why, in addition to specialty expertise, you can also expect the same level of compassion and care as you get from your primary veterinarian. Frequent, clear communication helps you better manage the situation and endure the stress.

And we make the process of seeing us simple. Either you or your doctor can make the appointment. We'll arrange to get a copy of the records or you may be asked to bring them with you. You'll always know what we know and we promise to keep your veterinarian in the loop as well.

Practice Highlights

- Board-certified, full-time doctors who specialize in orthopedic, soft tissue & arthroscopic surgery
- Dedicated, around-the-clock staff for monitoring and care during recovery
- Physical rehabilitation equipment, including an underwater treadmill and resistance pool
- A private room where you can visit with your pet in a comfortable, non-clinical environment
- Kennels and runs to house all sizes of pets

"Dr. Mason and Dr. Geels go out of their way to be accessible. I called them on Wednesday last week and they were here operating on Thursday. It was a shattered elbow that needed to be addressed right away, and before we had them in Las Vegas full time, the client would have to go out of state for immediate help."

Dr. John Wallace, VCA Spring Mountain
