

“When I refer clients to a specialist, I want to be sure their pets get the best of care, but also that they experience superb customer service.

The surgeons who are now at Las Vegas Veterinary Referral Center have performed surgeries on my patients two to three times a week, sometimes out of our facility.

We can be sure the clients and the patients are well taken care of and can rely on the doctors to provide prompt and thorough post-op follow-up and communication.”

CareCredit®
No Interest Client Payment Plans

We know that large veterinary expenses are often unplanned. In addition to accepting cash, checks and major credit cards, we offer CareCredit®. This no-interest or low-interest payment option can help your clients spread the cost of care over several months. Have them call us directly or visit www.carecredit.com for more information.

Las Vegas Veterinary Referral Center is a dedicated specialty practice that partners with local veterinarians to provide advanced diagnostic testing and treatment.

As a veterinarian, you want to provide the best possible care; however, some cases require equipment or a specialized skill set that may not exist in-house.

In the past, Las Vegas only had a handful of specialists, many of whom were visiting doctors not always available for urgent cases. We're here to address that need. Conveniently located at the Northwest corner of Tropicana and Durango, we're a specialty-only clinic with 11,000 square feet of examination, treatment and recovery facilities to accommodate your patients' needs.

Dedicated Specialists From Day One, With More To Come.

Primarily staffed by board-certified and veteran Las Vegas surgeons Dr. Jeff Geels and Dr. David Mason, the center will initially offer orthopedic, soft tissue and arthroscopic surgery, 24-hour recovery care, physical rehabilitation and ophthalmic care.

We understand that a self-contained facility staffed with full-time practitioners in a variety of fields is a benefit to veterinarians in and around Las Vegas. That's why, in the coming months, we will be hiring experts in oncology, internal medicine, dermatology, critical care, neurology, sports medicine and radiology from around the nation.

Refer Your Patients To A Specialty Practice That Offers The Same Level Of Compassion And Expertise You Do.

Our goal is to serve as an extension of your practice, providing rapid access to specialists and timely communication throughout the process so that your clients are confident their pets are in good hands. Because we know general practices are busy, we've made our process simple.

Referring veterinarians may call in for a phone consultation or simply fax, mail or email a one-page form and any applicable records. Appointments may be made by either the client or the referring doctor. Once booked, we confirm with both parties and follow up with the referring doctor and client immediately after the procedure.

Within 24 hours, you'll receive documentation of treatment and next steps so you'll be well informed when your client returns for ongoing care.

Board Certified Veterinary Specialists Who Not Only Perform Complicated Surgeries, They Teach Them.

Drs. Hoefle and Mason have both taught surgery at the University level, inspiring a commitment to continuing education. Our facility allows for easy observation of surgeries and other procedures, offering the opportunity for general practitioners to learn about the latest in specialized medicine.

We also host classes on a variety of subjects that will help fulfill your continuing education requirements.

We look forward to becoming an active part of the Las Vegas veterinary community. Please call or stop by for a tour of our new facility.

Practice Highlights

- Board-certified, full-time doctors who specialize in orthopedic, soft tissue & arthroscopic surgery
- Dedicated, around-the-clock staff for intensive care and monitoring during recovery
- Physical rehabilitation equipment, including an underwater treadmill and resistance pool
- A private room so clients can visit with their pets in a comfortable, non-clinical environment
- Digital radiography rather than traditional x-rays so that files can easily be shared online or via email
- 24-hour turnaround on post-procedure reports
- 11,000 square feet of clinic space that will accommodate future offerings
- Kennels and runs to house all sizes of pets
- Friendly, compassionate service to your clients and the best care for your patients
