**Automated Oracle Database
Management with AutoDBA®**

AutoDBA® Benefits

Reduce cost, time, and effort

associated with managing Oracle

databases by **automating** routine

tasks and making non-routine

tasks more efficient.

Improve performance and

uptime of databases through

proactive maintenance,

monitoring, and tuning

with less error and omission.

Eliminate surprises, stress,

fire drills, and errors through a

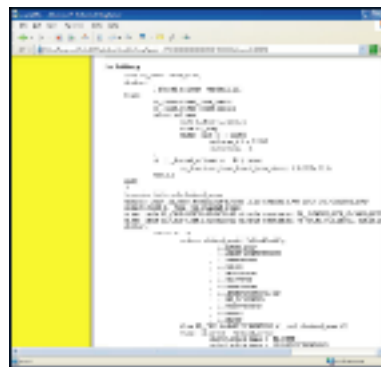

common, **policy-driven** approach

with built-in **best practices**.

Expensive Talent. Menial Tasks.

You employ expensive, talented DBAs who spend time solving difficult problems. Unfortunately, they also spend time on redundant maintenance tasks – a poor use of their talent and your money.

Enter AutoDBA®. This innovative product from Senware automates basic Oracle management, freeing up your IT assets for more value-added work.

Script Generation Screen Shot

AutoDBA writes and executes custom Oracle scripts to fix problems in your database. Storage management, tuning, object rebuilds – it's like having an Oracle consultant on staff who performs these tasks for free. Our automation is engineered to be appropriate for mission-critical, enterprise systems – controllable, smart, non-invasive, and safe.

AutoDBA also has productivity tools for things DBAs like to do themselves, such as advanced tuning, reporting, trouble-shooting, and diagnostics.

Query Tuning Screen Shot

And with flexible monitoring and notification features, you can keep tabs on whatever system events are important to your organization.

Performance Tools Screen Shot

Every month you invest in IT personnel. Let AutoDBA help them give you a better return.

Reap the benefits... Find out more about AutoDBA. Call (303) 279-7626 x24 or email info@senware.com.
