

# medicom software

## Congratulations!

You are on your way to improving the prior authorization/referral process in your office. Installing this CD will help you eliminate the constant chaos of forms, paperwork, and busy signals. The software is both user-friendly and robust and will provide your organization with a proven alternative to an outdated, inefficient and ineffective (manual) process. Enjoy!

**Need Support? Call xxxxxxxxxx.**

## Minimum Requirements

### *For Windows Client:*

- Windows 95, 98, ME, NT 4.0 Workstation (SP4 or above), 2000 Professional, or Windows XP Professional.
- FileMaker Workstation 5.5 software (requires a unique serial number for each PC on the network).
- A CD drive must be available to each PC.
- A network card installed and properly configured for the network with TCP/IP or IPX networking.
- Administrator access to the workstations (NT 4.0 or 2000).

### *For Printing:*

- A printer attached to the computer or available through the network. The drivers should be installed and tested prior to the installation.
- The printer should be a laser printer with at least 16 MB RAM.
